

CPSC 304 Project Cover Page

Milestone #: 4

Date: August 6, 2025

Group Number: 21

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
Arshia Zargarán	72033004	x4e7u	arshia.zargarán@gmail.com
Katelyn Chun	19372317	b4v6q	chunkatelyn@gmail.com
Amishi Arora	62983465	k5w4p	amishia859@gmail.com

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

Description:

Our project is a recipe management system. Users can upload, edit, and view various recipes. Recipes have ingredients, equipment, steps, and different tags (like dietary restrictions and cuisine types). Users can also sign up for courses taught by professional chefs who demo a recipe. We implemented features for users to filter recipes, filter courses, and view course registration statistics.

Final Schema Changes:

- Changed TEXT to varchar(500) for the description of recipe, as this was easier to work with in JavaScript
- Some small changes in the naming for consistency purposes
- No other changes

Copy of Schema:

Primary keys underlined, foreign keys bolded

recipe(rID: int, **uID**: int, title: varchar(50), description: varchar(500), servings: int) uID is not null

user(uID: int, email: varchar(50), uName: varchar(50)) email is unique and a candidate key

favourites(**uID**: int, **rID**: int)

professionalOne(YOE: int, rank: varchar(10))

professionalTwo(**uID**: int, YOE: int, speciality: varchar(30))

ingredient(iName: varchar(30), type: varchar(30))

hasTag(**tName**: varchar(30), **rID**: int)

equipment(eName: varchar(50), whereToBuy: varchar(50))

registers(**uID**: int, **cID**: int, date: date)

demosRecipe(**rID**: int, **cID**: int)

containsOne(**iName**: varchar(30), amount: varchar(30), cost: number(5, 2))

containsTwo(**rID**: int, **iName**: varchar(30), amount: varchar(30))

tag(tName: varchar(50), type: varchar(50))

step(**rID**: int, stepNumber: int, image: varchar(50), description: text)

requiresEq(**rID**: int, **eName**: varchar(50))

courseOne(**teacherID**: int, duration: int, difficulty: varchar(10), price: number(5, 2)) teacherID is not null

courseTwo(cID: int, **teacherID**: int, cName: varchar(30), difficulty: varchar(10), duration: int) teacherID is not null

review(reviewID: int, **rID**: int, **uID**: int, rating: int, comment: text) rID and uID are not null, (rID, uID) is unique and a candidate key
